

# THE OSMIUM VIOLIN

## THE STORY

In July 2020, Kurt Assam and Karl Großschädl commissioned famous violin maker Edgar Russ to build the world's most precious new violin, the Osmium Violin. This UNICAT violin has 541 crystalline osmium inlays as well as 298 diamonds, rubies, sapphires, and tsavorites all hand-set in 18 carat gold. Taking 32 months to build, it is made of high-quality precious woods such as Italian hazel spruce, Bosnian sycamore maple and ebony from Cameroon.

## THE WORLD TOUR

In March 2023, the Osmium Violin began its tour, being showcased in prestigious gatherings around the world.
